

All children should be provided the time and secure space to be children.

Safe communities foster better protection for our children and ward off potential abusers. ChildSafe is a harm prevention charity that empowers adult carers to achieve this aim. ChildSafe training is a valuable starting point.

Are you ChildSafe?

Safety at work and play

If you work with children and vulnerable people, ChildSafe's Online training provides key tools on how to care for their safety, and protect you in your work.

It will give you a better understanding of the safety issues at stake and the serious consequences of not taking action.

Protect those you care for and yourself

The ChildSafe online training course is designed to help you keep children and vulnerable people safe. The course will help you with an understanding of:

- The need for personal and organisational child safety management
- Ways to deal with incidents of abuse and malicious behaviour
- Appropriate conduct that safeguards leaders
- How to support the rights of children and vulnerable people
- Ways to create a safe environment for all

Additional resources are included to assist you in your course and at work.

Play it safe

The course is based on a system that uses principles in the ISO3100 Risk standards. It takes about 90 minutes to work your way through this online training including an assessment at the end. Then, on successful completion, you will be better equipped and awarded with a ChildSafe certificate – a valuable addition to your resume!
