About ChildSafe

Researched and proven standards and training resources to help keep children and vulnerable people safe.

ChildSafe is a not-for-profit harm prevention charity. The genesis of the ChildSafe Safety System was developed under Scripture Union (SU) Australia reflecting over 100 years of camping and outdoor activity with children and young people. It is used widely across Australia and New Zealand by community organisations and schools, but particularly in the church sector.

Safety concerns common to community organisations can be solved

Tackling systematic safety shortcomings that allow harm to children and vulnerable people, is a defining issue common to community and volunteer organisations.

"...few organisations that submitted to the Inquiry put a strong emphasis on assessing and mitigating risks within their organisation."
Victorian Betrayal of Trust Report, 2013, p255

Tailored to your organisation, ChildSafe SP3 provides affordable tools and standards to define your pathway to mitigating these shortcomings.

These tools, proven for over ten years, empower staff and volunteers to act more decisively over safety gaps.

A unique online system provides a strong and secure record of safety management for organisations large and small.

Resources

SP3 provides an achievable and robust Safety Management System providing tools that help community organisations protect children and vulnerable people. It strengthens management practice and provides a Code of Practice at ground level.

- ✔ Training
- ✔ Appointment and screening
- ✔ Safety planning
- ✔ 'Permission to Proceed' protocol
- ✔ Safe practice
- ✔ Emergency response

Training

Training is a critical element to build the safety capacity of any organisation. Training enhances the culture and safety management.

- ✔ SP3 provides training guides and tools to build safety capacity
- ✔ Resource to support face-to-face training delivery
- ✔ Online training modules
- ✔ Templates to guide training

Safety Management Online (SMO)

ChildSafe has developed a unique online system that provides community organisations large and small, an instant Safety Management tool.

- ✔ 24/7 access for management and activity assurance
- ✔ User access at relevant authority level
- ✔ Secure encrypted database
- ✔ 'Permission to Proceed' protocol
- ✔ Screening controls
